

HARSH BOSAMIYA

Aspiring Data Analyst | Power BI • SQL • Python

+91 97734 21444 | hpbosamiya1122@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on project experience across **SQL, Power BI, DAX, and Python**, built through four end-to-end analytics projects spanning e-commerce, HR, streaming media, and smart mobility domains. Skilled in data cleaning, exploratory data analysis, data modeling, and dashboard development, with a track record of turning raw datasets into clear business insights and KPI-driven visualizations. Brings a strong technical foundation from a completed web development internship, including experience with databases, APIs, and application logic, now transitioning into data analytics and business intelligence.

TECHNICAL SKILLS

Data Analytics: SQL, Data Cleaning, Exploratory Data Analysis, KPI Analysis, Business Insights, Data Visualization

Business Intelligence: Power BI, DAX, Data Modeling, Interactive Dashboards, KPI Development, Dashboard Storytelling

Programming: Python, Pandas, NumPy

Databases: Microsoft SQL Server, PostgreSQL, MongoDB

Web Development: React, JavaScript, HTML, CSS, Tailwind CSS, Node.js, Express, REST APIs

Tools: Git, GitHub, Jupyter Notebook, Power BI Desktop, SQL Server Management Studio

DATA ANALYTICS PROJECTS

CityPulse Analytics — Smart Mobility Analytics Dashboard | Python • Pandas • SQL Server • Power BI • DAX

<https://github.com/harshbosamiya18/CityPulse-Analytics>

- Built an end-to-end analytics pipeline — Python-based EDA and feature engineering, SQL Server validation, Power BI data modeling, and DAX measure development — culminating in a **4-page interactive dashboard**.
- Analyzed traffic volume, speed, road occupancy, and congestion alongside emissions, energy consumption, ride-sharing demand, parking availability, accident activity, weather, and public sentiment to surface mobility trends across the dataset.
- Designed dedicated dashboard pages for **Executive Mobility Overview, Traffic & Congestion, Geography & Sustainability, and Mobility Insights & Operations**, enabling stakeholders to drill from high-level KPIs into operational detail.
- Authored **10+ reusable DAX measures** (Total Vehicles, Avg. Traffic Speed, Avg. Road Occupancy, Avg. Mobility Pressure, Avg. Emissions, Avg. Energy Consumption, Accident Count/Rate, Avg. Sentiment Score, and more) to standardize metrics across the dashboard.

E-Commerce Sales Dashboard | Power BI • DAX • SQL

<https://github.com/harshbosamiya18/Ecommerce-Sales-Dashboard-PowerBI>

- Queried and cleaned e-commerce sales data in SQL, then built an interactive Power BI dashboard to track sales, product, and regional performance against defined KPIs.
- Designed custom DAX measures to convert raw transactional data into actionable insights for business decision-making.

HR Analytics Dashboard | Power BI • DAX • Data Analytics

<https://github.com/harshbosamiya18/HR-Analytics-Dashboard-PowerBI>

- Built an interactive HR analytics dashboard covering employee demographics, attrition, salary, and performance metrics using DAX-driven KPIs.
- Identified workforce and retention patterns from the data to inform HR decision-making.

Netflix Analytics | Python • Pandas • Data Analysis • Data Visualization

<https://github.com/harshbosamiya18/Netflix-Analytics-Dashboard-PowerBI>

- Performed data cleaning and exploratory data analysis on Netflix content data using Python and Pandas.
- Analyzed titles, genres, release years, and content characteristics to uncover patterns in content distribution, and visualized findings for quick interpretation.

PROFESSIONAL EXPERIENCE

Web Development Intern (React) Jan 2026 – Apr 2026

SaaS Innova Pvt Ltd • 4-month internship (completed)

- Built and maintained frontend components for a **POS system** using React and Tailwind CSS, covering billing, product-management, and sales-dashboard modules.
- Integrated REST APIs with a Node.js/Express backend to support database-driven application functionality.
- Collaborated with the team on debugging and feature development, strengthening skills in application logic, API integration, and database interaction — technical foundations now applied directly to data analytics and BI work.

EDUCATION

Parul University Vadodara, Gujarat, India

B.Tech. – Computer Science & Engineering | CGPA: 7.44/10 • Expected Graduation: May 2026

12th | CBSE | Percentage: 70.8/100 — Jun 2022

10th | CBSE | Percentage: 72.67/100 — Apr 2020
